<u>Subj.</u>: Invitation

Dear Wenkai Yang,

It is a pleasure for me to extend to you an invitation to our department for an extended research stay, from March 1, 2026 to June 30, 2026. During your stay you are supposed to work with the colleagues in our Research Group for Algebra and Number Theory. A focus of our joint research will be on the overlap of factorization theory and additive combinatorics.

As you know, our group in Graz has a longstanding and successful cooperation with several research groups in China: among others with the group of your PhD advisor, Prof. Weidong Gao (Tianjin University), with Prof. Zhi-Wei Sun (Nanjing University), and Prof. Pingzhi Yuan (South China Normal University). Prof. Salvatore Tringali was a member in our group and he is now professor at Hebei Normal University. Moreover, we hosted many young Chinese researchers from Nankai University (for short and long term stays; in particular, Qinghai Zhong is in our group since many years).

I have seen your research work, which provides a perfect start for our cooperation. Moreover, we have been in contact already since a couple of months. Thus, I do know that your level of English is highly sufficient for your visit.

We will be happy to provide you with the usual working environment at the University of Graz (in particular, the use of a computer, and the library). Furthermore, we will cover your lodging expenses in Graz from March 1 - June 30. However, you have to take care of all relevant insurances (including the medical insurance) of your own.

We very much hope that you will be able to accept this invitation and we look forward to your visit.

Yours sincerely

Prof. Dr. Alfred Geroldinger
